Professional Summary:

Dedicated and results-oriented Software Engineer with diverse experience in frontend and backend development, cloud computing, and DevOps. Certified AWS Developer Associate. Demonstrated history of improving system efficiency and streamlining operations. Strong ability to leverage diverse toolkits to deliver high-quality software solutions.

Education:

AWS Certified Developer Associate Certificate, Boca Raton, FL - December 2022

Boca Code, Boca Raton, FL - Software Engineer Career Course - June 2021

- Engineer the Change Scholarship Recipient

Florida Atlantic University, Boca Raton, FL - December 2019

Business and Management Information Systems (IT Security Focus)

- Graduated with a focus on IT Security, laying a solid foundation for a career in Software Engineering.

Skills:

- Frontend: HTML, CSS, JavaScript, SASS, Bootstrap, Tailwind, Vue, Nuxtjs, React, Nextjs, React Native, TypeScript
- Backend: Node, Express, C#, Java, Python, Docker, Nestjs
- Databases: SQL (MySQL, Postgres), NoSQL (Firebase, MongoDB)
- Cloud: AWS, GCP, Azure
- Dev Ops: Kubernetes, Terraform, Kafka
- Other: Git, PowerShell, Linux, Cypress, Jest, Mocha

Experience:

Torticity LLC, Boca Raton, Florida - **Software Engineer** (Jan 2022 – Present)

- Assisted in the successful launch of the Claimant Portal, an external application that streamlined the intake process and provided a secure way for users to upload documents for Personal Injury cases.
- Implemented core features on the internal Docket application, including the integration of predefined filters using Algolia.
- Implemented a pivotal feature on the Brief application, enabling users to view documents by leveraging the AWS SDK to interact with S3.

Watsco Ventures, Miami, Florida - **Platform Engineer** (July 2021 – Jan 2022)

- Worked closely with a senior engineer to completely overhaul three CI/CD pipelines, simplifying their configuration and drastically improving the development team's productivity.
- Developed custom bash scripts for setting up the boilerplate infrastructure, enabling rapid implementation of new services through environment variable configuration and script execution.
- Collocated the Infrastructure as Code (IaC) so that each service owned its own infrastructure, primarily using Terraform, AWS CodePipeline, and AWS CodeDeploy.
- Simplified our Kubernetes setup and enabled VPC peering between our Kafka cluster and Kubernetes cluster to meet custom business requirements.

Flex Shopper, Boca Raton, Florida - **Junior System Admin** (February 2021 – April 2021)

- Conducted successful migration of users from on-premise exchange to Azure, streamlining operations and reducing maintenance efforts.

Incapital LLC, Boca Raton, Florida - **Junior Developer Intern** (October 2019 – December 2019)

- Troubleshoot and resolved various errors on the Incapnet website platform, improving overall system stability.
- Leveraged C# object-oriented design to rectify errors and generate new logic, preventing recurrence of similar issues within the MVC application.
